# FIRE AND SMOKE DAMAGE REMEDIATION WITH DRY ICE CLEANING

- Decontaminates
- Cleans all surfaces
- Odour removal
- Non-abrasive process
- No secondary waste stream

Fire and smoke can cause significant damage to buildings and equipment, with odours lingering for a significant amount of time. With Dry Ice Cleaning, it is possible to restore equipment and buildings damaged through fire or smoke to a high standard.

## Dry Ice Cleaning for Fire and Smoke Remediation

Dry Ice Cleaning is an extremely effective solution to fire and smoke damage. It is suitable for use on process and production equipment and all surfaces e.g. tiles, concrete, steel, glass, wood, plaster and ceramic, as well as electric wiring, cables, distribution boards etc.

## Superior Quality Clean

Dry Ice Cleaning efficiently and effectively cleans and decontaminates. It removes soot and smoke contamination from equipment and surfaces, producing a superior quality clean. It can also access hard to reach areas, such as tight angles and around wiring and nails.

## Odour Removal

As Dry Ice Cleaning decontaminates as it cleans, it immediately removes the smell of smoke.

## Fast, Effective Process

Dry Ice Cleaning is a fast, effective process. Due to this, equipment downtime is minimised.

## No Mess, No Chemicals

As Dry Ice sublimates to gas, the process does not produce a secondary waste stream and there is no extra clean up needed. This reduces time and labour costs. This also means that there are also no disposal costs for secondary waste. Dry Ice Cleaning does not use any chemicals, which can be expensive to dispose of.

## Non-Abrasive

Dry Ice Cleaning is a non-abrasive process, and therefore will not cause damage to the structure or the integrity of the substrate.

## Non-Conductive

Dry Ice Cleaning is a non-conductive, dry, moisture-free process; safe for use on electrical components such as wiring, switches or motors.

## Who are Polar IceTech?

We at Polar IceTech are solutions providers that specialise in Dry Ice Cleaning. We have nearly 15 years of experience providing sustainable cryogenic cleaning solutions to suit our customers' needs. We mobilise teams across the island of Ireland to provide this service.
